

# Table Snap Visual Probe

This page has a short prose table. It should not collapse to the exact text width; the resolved table width should snap to the first body-grid track and paint as a stable object.

Key	Value
A	One
B	Two

This second table is naturally wider than two-thirds of the measure. It should promote to the full body width instead of leaving a narrow remainder.

Layer	Description
Capability infrastructure	Quality schooling, safe hostels, mentors, digital access, paperwork literacy, and peer networks.
Economic independence	Capital, credit, housing, jobs, professional networks, market access, and the ability to refuse gatekeepers.

The prose after the tables is here to make any width, spacing, or overlap problem visible against normal body text.
